

High-Voltage Lab Rig (HVLR) At a glance

CE konform

HVLR: High-Voltage Lab Rig
for safe testing of power
electronics (e.g. converter)

Touchscreen or external monitor
as central operating and display unit

Modular design: adaptable e.g. with
capacitor bank, dummy load etc.

Best possible **lab safety**,
component protection and wear
reduction

HVSB: High-Voltage Safety Box
for safe switching and monitoring
of high-voltage

Safety functions included:
isolation monitoring, HV interlock,
Safety PLC, emergency shut-off

HV-DC-Power-Supply
up to 1,200 V

Enables testing of power
electronics at an **early stage of
development**
